

Peter Ugochukwu Ndujekwu

Electrical & Electronics Engineering Undergraduate · Software Engineer

ugopeter26@gmail.com | 0706 121 7361 | Lagos, Nigeria
github.com/ndujesco | linkedin.com/in/ndujekwu

Final-year First-Class Electrical & Electronics Engineering student with a strong record in both engineering coursework and applied software, and a national hackathon-winning track record.

EDUCATION

University of Lagos · B.Eng. Electrical & Electronics Engineering

2020 – 2026

- **CGPA: 4.76 / 5.0 · First Class Honours (projected)**
- Relevant coursework: Circuit Theory, Signals & Systems, Control Systems, Microcontrollers & Embedded Systems, Electronics, Digital Signal Processing, Communications.
- Tools: MATLAB, Proteus, LTSpice, Fritzing, Arduino.

HONOURS & AWARDS

- **Grand Prize Winner · Zecathon 2025** (Zenith Bank Tech Fair 5.0), Team TrustLoop: ₦30,000,000 for a digital KYC & liveness-verification solution, selected from 100+ competing teams.
- **Winner · ABC Hackathon**, Team Zeroday Saints (FIG, a federated national digital-identity gateway).
- **Finalist · Cyberfest Hackathon**, Team Zeroday Saints (SpecterAPI, an API-security tool).
- **Winner · Afrihack**, Team Aegis.
- First-Class standing maintained across the EEE programme.

LEADERSHIP

Technical Lead · Claude Builder Club, University of Lagos

2025 – Present

- Lead the technical arm of UNILAG's official Anthropic-powered student AI community.
- Mentor students to build real projects with the Claude API; helped run the Claude Hackathon (110+ teams).

ENGINEERING & RESEARCH PROJECTS

Arduino-Based Digital FM Radio

Jun 2024

- Designed a digital FM radio circuit in Fritzing and programmed an Arduino Uno for signal processing and frequency tuning.
- Integrated the TEA5767 FM receiver module and LM386 amplifier for high-quality audio output.

Automatic Light Switch with Motion Detection

Jan 2024

- Built a motion-activated lighting system using sensors and electronic components to improve energy efficiency.

Crypto-Graph Watch

Coursework

- Implemented data-visualisation tooling for cryptocurrency trends in MATLAB.

TECHNICAL SKILLS

Engineering	MATLAB, Proteus, LTSpice, Fritzing, Arduino, Embedded C
Programming	C++, C, Python, JavaScript, TypeScript, SQL
Software	React, Next.js, Node.js, NestJS, FastAPI, Flask, MongoDB, PostgreSQL, Git, Docker

SOFTWARE EXPERIENCE

Software Engineer Intern · Afretec Network

Sep 2024 – Dec 2024

- Engineering placement with a startup; received organisational recognition for contributions.

Backend Engineer · TekTalk NG · Huelage

2022 – 2024

- Built and scaled backends (Node.js/MongoDB, NestJS/GraphQL); owned testing and code reviews.
